Comments:

Variety, seed grower, and source (state) is provided solely by the seed receiver. We transfer that information to this book.

Plants were VISUALLY read, unless otherwise indicated.

Flags with the number 1 (or no number): indicates the seed lot was read prior to June 20.

Flags with the number 2: indicates the seed lot was read on June 20.

MOSAIC does not necessarily mean the plant has PVY; rather, it is expressing symptoms that are commonly associated with PVY infection.

10+ indicates more than 10 plants in particular seed lot were affected within a specific category. In seed lots with 10+ infected plants, NOT ALL PLANTS WERE FLAGGED when displaying symptoms.

Additional copies may be obtained from the Washington State Potato Commission, 108 Interlake RD, Moses Lake, WA 98837, (509)765-8845; or from Dr. Mark Pavek, Washington State University, PO Box 646414, Pullman, WA 99164-6414 (509)335-6861. Electronic copies are also available at potatoes.wsu.edu.
