KEY TO FLAGS

LEAFROLL: Orange Flag
BLACKLEG: Red Flag
MOSAIC: Yellow Flag (see description below in comment section)
WEAK PLANTS: Pink Flag (plants < 50% the size of the average plant at reading)

WHITE FLAGS *(code to abbreviations)*
Cal: Calico
Chem: Seed-borne herbicide damage
PLO: Phytoplasm such as Witches broom, Haywire, Purple Top
VM: Variety mix
OT: Off-type, genetic variation within variety

Comments:

Variety, seed grower, and source (state) is provided solely by the seed receiver. We transfer that information to this book and save the original tags. Please contact Mark Pavek with any concerns or changes.

There should be a plant every 10-12 inches. Exceptions include: seed lots that were sampled multiple times - each sample is separated by a 5 foot skip within the same row, seed tubers too large for planter, or plant did not emerge.

Plants were VISUALLY read, unless otherwise indicated. In some cases, plants were kit-tested for PVY.

MOSAIC does not necessarily mean the plant has PVY; rather, it is expressing symptoms that are commonly associated with PVY infection.

10+ indicates more than 10 plants in particular seed lot were affected within a specific category. In seed lots with 10+ infected plants, **NOT ALL PLANTS WERE FLAGGED** when displaying symptoms.

Additional copies may be obtained from the Washington State Potato Commission, 108 Interlake RD, Moses Lake, WA 98837, (509)765-8845; or from Dr. Mark Pavek, Washington State University, PO Box 646414, Pullman, WA 99164-6414 (509)335-6861. Electronic copies will also be available at potatoes.wsu.edu.
